Office of Air, Waste & Toxics

RE: PCC Structural, Inc. LPC Wastewater Discharge  
40 CFR 403.12 (p)(1) Notification and (p)(4) Certification

Dear Mr. Albright,

In accordance with 40 CFR 403.12 (p)(1), PCC Structural, Inc. is notifying the City of Portland Columbia Blvd POTW, EPA Regional Waste Management Division Director, and Oregon DEQ hazardous waste authorities of an authorized discharge to a POTW of a substance, which, if otherwise disposed of, would be a hazardous waste under 40 CFR part 261. The discharge was 0.052 kg of F001 (trichloroethylene) and 0.43 kg of F001 (tetrachloroethylene) generated between 5/26/2009 and 6/2/2009. The batch discharge to the Columbia Blvd. POTW occurred between 08/21/2009 and 08/23/2009, originating from the LPC facility located at 4600 SE Harney Drive, Portland Oregon 97206. The trichloroethylene and tetrachloroethylene were contained-in approximately 10842 kg of waters generated during a site investigation.

Furthermore, in accordance with 40 CFR 403.12 (p)(4), I certify this facility has a Toxic Use Reduction and Hazardous Waste Reduction Plan in place. This program is designed to reduce the volume and toxicity of hazardous wastes generated to the degree PCC Structural, Inc., has determined to be economically practical.

Please feel free to contact me at 503-777-3881 if you have any questions regarding this notification and certification.

Sincerely,  
For PCC Structural, Inc. by
